

SEG V

Extensions and Amendments in Software Version 74

Things To Know – An Overview

Innovations

- | Extension and inclusion regarding the anti-glare high-beam assist function for Audi RS e-tron, Cupra Formentor, Cupra Leon, DS Automobile DS4-II, Mercedes GLC-Class, Mercedes SL-Class, Seat Leon, Skoda Enyaq and Skoda Octavia IV.
- | You can select the correct AFS algorithm (antiglare high beam) with the brand-specific name: e.g. Audi HD Matrix, Ford ILS, Skoda Matrix Kink etc.
- | You can save a quick test as documented test after having done the measurements.
- | The selected AFS algorithm is saved for manually created vehicles.

Revisions

- | Actualization of vehicle database - 86 new vehicles.
- | Optimization of the AFS selection (antiglare high beam) on BMW vehicles, which have several AFS functions installed.

SEG V

Functions According to Manufacturer

This list merely gives a basic overview of the scope of our data extensions. A complete list with all the model additions for every manufacturer would be simply too extensive.

Extended and Revised Manufacturers

The following list comprises the vehicles which require a special procedure for calibration / alignment of the light distribution, such as the antiglare high beam.
